GRANITE AND BASALT

We offer Granite that is ideal for use around pools, houses and on driveways. It weathers well, it looks fantastic and will stand the test of time. JR Stones granite is very reasonably priced. Granite offers a comparatively even look with minor colour variation from piece to piece.

The granite is available in Six colours - Light Grey, Dark Grey, Almond, Mushroom, Honey and Spice. We also have a variety of finishes in the basalt, including Flamed, Honed and Sandblasted. Each colour is

available in a variety of paver and tile sizes, what's more, we also stock a range of bull-nose and Pencil Square edge options to suit pool copings and surround steps. If our standard sizes don't suit, you can have granite cut to just about any size that you need provided you allow approx eight to ten weeks from order placement.

The colours shown here should be used as a guide only. All printed images vary and hence the colours will vary depending on the ink and paper on which they are printed. For a more accurate indication of colours, please see samples on display at JR Stone.
